EDUCATION

Full-Stack Software Development Project
DigitalCrafts

January 2023 - Current • Atlanta, GA (Remote)

Full-Stack Web Development: Immersive course covering HTML, CSS, JavaScript, and Python, including an emphasis on cutting-edge frameworks like React/Redux and server-side technologies including Node.js, Express, and SQL.

Bachelor of Business Administration – BBA, Integrated Marketing with an emphasis in Communication
San Diego State University

2006 - 2010

Integrated marketing communication makes marketing activity more efficient and effective because it relies on multiple communication methods and customer touch points to deliver a consistent message in multiple means and in more compelling ways.

SKILLS

- HTML
- CSS
- JavaScript
- FlexBox
- React
- Redux Toolkit
- Node.js

RECENT PROJECTS

QuizLite

Sole Developer • June 2023 • [GitHub](#) • [Live](#)

Description and Tech Stack: QuizLite is a web development quiz game to test your knowledge on the latest programming language including JavaScript, MySQL, HTML, Bash, etc. This independent project was built primarily using React and Redux toolkit and features a custom API and styling with CSS.

Super Search

Full-Stack Developer • May 2023 • [GitHub](#) • [Live](#)

Description and Tech Stack: SuperSearch is a web development information portal on your favorite Marvel superheroes. This independent project includes front-end built-in JavaScript with the help of partials to help with building a clean UI experience. The server-side code was built with server templates and node.js with Sequelize to build a database and used for database interaction. Overall SuperSearch provides a user-friendly experience for users seeking information on their favorite Marvel superhero.

The Mixology Master

Front-End Developer • April 2023 • [GitHub](#) • [Live](#)

Description and Tech Stack: The Mixology Master is a collaborative project with my classmate John Garcia while leverages vanilla JavaScript, HTML and CSS. This application is designed to fetch data from two APIs to give users recipes and measurements of your favorite drinks. If the user sees their favorite drink they just need to click the heart and it is saved in the Favorites page.

PROFESSIONAL EXPERIENCE

Website and Graphic Designer
